

FACT SHEET

RETS-REMP ANALYTICAL SERVICES

Eberline Analytical Corporation's Richmond, California laboratory, the nation's longest continuously operated commercial radiochemistry laboratory, has provided radioanalytical services to the commercial nuclear industry for more than 30 years. Our analytical services include support for Radiological Effluent Technical Specifications (RETS) and Radiological Environmental Monitoring Program (REMP) implementation, as well as 10 CFR 61 waste characterization.

Broad Capabilities to Support REMP Implementation

- Radiochemistry analysis for full spectrum of analytes
- Analyses for interlaboratory comparisons
- Field Services group to support sampling
- Consulting Services group to support evaluation and report preparation
- Ability to perform non-radiological analyses through our Lionville Laboratory located in Exton, Pennsylvania

Qualifications and Credentials

- NELAP accreditation
- NUPIC approval
- Comprehensive radioactive materials license

Proven Quality Assurance/Quality Control Program

- QA/QC program compliant with Regulatory Guide 4.15
- Analyses performed according to proven, audited procedures
- Participation in national performance evaluation programs

Custom Deliverables

- Data available in hard copy and electronic formats
- Capability to provide electronic data deliverables according to any client specifications

EBERLINE ANALYTICAL CORPORATION

A Wholly-Owned Subsidiary of Eberline Services, Inc.

Our experience includes support to radiological environmental monitoring programs at:

- Sacramento Municipal Utility District
- Lawrence Berkeley National Laboratory
- Lawrence Livermore National Laboratory
- Hanford site
- Pacific Northwest National Laboratory
- STARS USA

Analytes include:

- Gross alpha
- Gross beta
- Alpha spectroscopy (Pu, Am, U)
- Gamma spectroscopy
- Strontium 90
- Liquid scintillation (H3, Ni-63, C-14)
- Others available
